Judith -

With the news today that you'll be examining properties near the Saint-Gobain plant (https://www.epa.gov/sites/production/files/2016-04/documents/hoosick_falls_fact_sheet_4_sampling_final.pdf) I feel that our property may be worth looking at. While you are focusing closer to the plant and west of it, perhaps we could be your one 'east' sample. Our property is roughly as far away from SG as the contaminated village wells.

I'd like to volunteer our property for sampling, as we live near the McCaffery Street plant. Our address is on Railroad Ave, which is a side street off of Carey Ave, just East of Waterworks Road. Our property descends down a small hill rapidly to a swampy area that is about 50 feet east of Waterworks Road.

If this is possible, please let me know who'd be the best person to contact.

Thank you

Brian Bushner
